

Title: FamPat Enhancements

Date/Time: Sunday May, 21st, 7:00AM – 12:00 PM

Presenter: Laetitia Aymonim

This workshop will cover significant enhancements we have made over the last year in content, features, and user friendliness of our web products and services, with special focus on FamPat. FamPat has been enhanced with additional data, including cited references and other high-value-added textual content, and is included in our QPAT and PatentExaminer services. The new IPC 8 and Questel•Orbit's implementation in FamPat and other databases will also be a key part of this workshop. Citation analysis commands in FamPat will be highlighted as well, with examples of how these citation features can be used for prior art searching.
