Legal status is an increasingly important aspect of the work of many patent information specialists. In recent years, information needs have changed to reflect new industry priorities. There has been a growing demand for access to more than the major information sources (PAIR, epoline, INPADOC). The purpose of this workshop is to consider some of the growing range of legal status information services covering international/regional systems and ‘minor’ countries. Topics will include PCT legal procedures, the individual national patent offices of Europe and some examples from other parts of the world.

**IMPORTANT NOTE:** Registrants are invited to submit requests to include specific countries of interest, but these MUST be received before May 6<sup>th</sup> to be considered for inclusion.

**Please note – Mid-morning refreshments will be available, but lunch will NOT be provided.**
