

Creating Patent Reports with Bizint SmartCharts for Patents

Sunday May 6th 1:30pm - 2:30pm

Presenters:

John Willmore, VP Product Development
Bertha Adamson, Product Support Manager
BizInt Solutions, Inc.
650 N. Costello Place, Orange, CA 92869 USA
tel: 1.714.289.1000, fax: 1.714.744.1316, email: support@bizcharts.com

Abstract:

The leading patent databases provide a wealth of value-added content. The BizInt Smart Charts for Patents software tool automates the task of creating a tabular report (chart) from search results from STN, Dialog, Questel, MicroPatent, Delphion, IDdb, Prou, Minesoft and Gene-IT. A chart provides the information professional with options for organizing this value-added data and delivering targeted reports.

This workshop is for both current users of BizInt Smart Charts and others interested in new tools for efficient analysis and presentation of patent information. The workshop will use a case study to demonstrate how you can use BizInt Smart Charts for Patents to:

- Combine information from different patent databases into one chart
- Combine an updated search with an earlier search, and use color coding and the new record status column to highlight new and changed information
- Identify common patent families across related records from different databases
- Customize chart content with user added columns and data pasted in from other documents
- Export data to an HTML, Word, Excel or PDF report, with links to full text patents on selected hosts

Biography:

John Willmore is co-founder of BizInt Solutions Inc., and manages the development of all aspects of the BizInt Solutions product line. John has a B.S. in electrical engineering from Rice University and over 15 years experience in software development. Outside of work, John enjoys training and competing with his four miniature longhaired dachshunds.

Bertha Adamson has been Product Support Manager for BizInt Solutions Inc. since 1998 and was a member of the original TRW Smart Charts team in the early 1990's. She divides her time between supporting BizInt Smart Charts development and supporting BizInt Smart Charts users around the world. Ms. Adamson has over 15 years experience in technology training, administration, and support. Her undergraduate degree from Harvard University is in the history of science, and her MBA from the University of Denver is in management information systems. When weather cooperates, she uses her travels to indulge her passion for photography.
