

Questel Updates on Industrial Designs and Patents

Presenter(s): TBD

This workshop will first provide an introduction to our new DesignFinder service for the protection and research of registered and patented international industrial designs. Attendees will get an overview of DesignFinder's various and powerful functionalities: single-platform search; display options; customization; alerting; reporting; sharing; and administration. The second part of the workshop will focus on recent enhancements to our QPAT service, including: a new high-performance platform; mosaic images; and content management, collaboration, and searching within PatentExaminer.

For registration please contact Laetitia Aymonin at 703 519-6731 or at laymonin@questel.orbit.com
