PIUG 2020 Annual Conference Workshop

Title: **Introducing PatBase 2.0, the biggest ever update to the PatBase**

Time and location:

Monday, October 26: 9:00am – 9:50am; Socio Virtual Conference App

Abstract:

This workshop will showcase Minesoft's most recent product enhancements, data, design and analytics updates in PatBase.

Users can now take advantage of lightning fast speed on a powerful patent database that can easily handle millions of documents at once. Working closely with user feedback, the Minesoft Development team has taken the opportunity to add to, update and improve many features. Rahman Hyatt will go through some of these new functionalities in a live demo, to show how PatBase 2.0 can transform the way you work.

Whether you are already a Minesoft customer, or simply interested in finding out more about our suite of patent solutions – register today for the Minesoft workshop.

_____

Presenter:

Rahman Hyatt, Minesoft Ltd.

Background:

Rahman has over 20 years' experience in the Patent Information Industry and has been at Minesoft since the early history of the company. He grew up in France, Switzerland and the UK, and as a tri-lingual Business Studies graduate he gained experience in the Intellectual Property Field at Questel.Orbit and Dialog before joining Minesoft, working with companies on site in Europe, North America, Australia and Asia.

Having trained clients on patent and trademark search tools extensively during his early career and acted as a Sales Manager across Europe, Rahman is an experienced senior member of the management team, a board director and shareholder of Minesoft. He plays an active role in business and product development and leads specific development projects for corporate clients in addition to overseeing the global sales and client services teams, combining his expertise in technology and patents.
