INTELLIGENCE

FAST, SIMPLE, ACCURATE FTO SEARCH

Learn how the Elute Patent Reader can make your FTO searches faster and easier through the power of forensic linguistics. Join Richard Nugent of Collier IP to see how our novel technology can help you become more efficient.

OUR TECHNOLOGY

We develop advanced tools to search, compare and analyse complex documents in large datasets. Our software automatically builds search terms from any text, including whole documents, you enter, removing the need for multiple keyword searches. It then ranks the results. You immediately see the most relevant patents at the top and, because the software is transparent, understand the reasons for the ranking.

SAVE TIME

Our simple three-step process -- define, compare, reveal -- helps you avoid wasting time on irrelevant documents.

ABOUT RICHARD COLLIER

Richard is Head of IP Strategy at Collier IP., where his role encompasses intangible asset audits, competitive intelligence, IP management and training, IP policy, and contracts consulting. He has a strong interest in new technologies and commercialising innovation.
